Tioga Research CEO to Deliver Keynote Address at UCSD Undergraduate Research Event

SAN DIEGO, Calif. – January 7, 2022: Tioga Research CEO, Dr. John M Newsam, has accepted an invitation to deliver the Keynote Presentation at the University of California San Diego (“UCSD”) Lab Expo 2022 event. Lab Expo is an annual UCSD research symposium which will take place this year on January 14, 2022 at the Price Center West Ballroom in the center of the UCSD campus. Lab Expo is run entirely by undergraduates through UCSD’s Biomedical Engineering Society (“BMES”) with the goal of developing scientific literacy, promoting interdisciplinary collaboration and encouraging scientific advocacy. The Lab Expo event provides a forum for researchers to present work to a large UCSD undergraduate population, providing exposure to a broad spectrum of innovative research being pursued on campus. More than 300 undergraduates and more than 20 presenters from various departments participated in the 2021 virtual event; the in-person event in the prior year included over 500 undergraduates, with more than 50 presenters across more than 15 departments.

“I was delighted to receive the invitation to present the keynote address from the 2022 Lab Expo committee, ably led by Rohil Ahuja and Wesam Kanim”, explained John M Newsam, Tioga Research’s CEO. “We enjoy a close interaction with the UCSD campus. Each year we mentor a number of UCSD undergraduates applied to interesting internship projects, and several of our staff have undergraduate or graduate degrees from UCSD. I am looking forward to presenting perspectives on the innovative research pursued at Tioga Research and learnings from my personal research career”.

About Tioga Research, Inc.

Tioga Research supports the research and early development of skin-applied products, offering formulation innovation and skin permeation screening CRO services. The company has pioneered high throughput experimentation (“HTE”) technologies for screening skin delivery. Tioga Research was founded in 2011, to support innovations in skin-applied products, especially topical and transdermal drug products, and including skin care products and cosmetics. With headquarters and laboratory operations in San Diego, CA and a business presence in the UK to support clients in Europe, Tioga Research has become a preferred service provider for an impressive portfolio of clients across the Americas, Europe and Asia. Tioga Research has been a subsidiary of Encube Ethicals since early 2020, enabling clients to leverage the combined strengths of both organizations from early formulation innovation through to commercial manufacturing.
